## EDUCATION

---

**Northeastern University** **September 2022 – April 2026**  
*Bachelor of Science in Computer Science* *Boston, MA*

## TECHNICAL SKILLS

---

**Languages:** TypeScript, JavaScript, Go, Python, Java, Kotlin, SQL.  
**Frameworks:** React, React Native, Svelte, Next.js, SvelteKit, Node.js, Express.js, Expo, Fiber, Flask, ElysiaJS.  
**Developer Tools:** Git, Docker, Vim, VS Code, Postman, Vercel.  
**Libraries:** htmx, jQuery, Axios, Jest, JUnit, Jinja.

## EXPERIENCE

---

**Northeastern Electric Racing** **April 2023 – Present**  
*Software Developer* *Boston, MA*

- Designing a full stack project management dashboard assisting 200+ users with 80+ projects using Typescript, React.js and Express.js.
- Demonstrating agility by promptly addressing and resolving issues and tickets on the platform.
- Thriving in a collaborative environment, enhancing communication skills, and cultivating efficient technical practices.

**Oasis at Northeastern** **May 2023 – Present**  
*Events Director* *Boston, MA*

- Orchestrating a series of development workshops open to all students throughout the semester.
- Crafting and refining educational documentation to empower students with knowledge in web development, app development, project management, and backend systems.
- Contributing to the formulation of future club initiatives and enhancements by actively participating in weekly executive board meetings.

**Khoury College of Computer Science** **July 2023 – Present**  
*Teaching Assistant* *Boston, MA*

- Nurturing the foundational understanding of Computer Science in first-year students through engaging teaching methods.
- Hosting accessible office hours for students, providing valuable assistance with assignments, programming concepts, and technical inquiries.
- Elevating student learning experiences through thoughtful grading, delivering constructive feedback on assessments and assignments.

## PROJECTS

---

**Freehand** | *TypeScript, Next.js, Tailwind CSS, tRPC, Prisma, PostgreSQL* **July 2023 – Present**

- Spearheading the creation of an open-source SaaS platform, enabling users to discover and download authentic illustrations to elevate their personal projects.
- Engineered an end-to-end type-safe API, proficiently managing user interactions and data requests.
- Orchestrated the implementation of a user authentication system using popular OAuth providers.
- Constructed and successfully integrated an e-commerce system, optimizing payment handling through Stripe.

**BeGroovy** | *JavaScript, React, Vite, Supabase, PostgreSQL, Spotify* **January 2023 – April 2023**

- Created a full-stack CRUD music-sharing social media website.
- Developed the client-side using React and styled the site with vanilla CSS and Bootstrap.
- Designed and constructed the backend workflow, leveraging Supabase for data storage and SQL queries for enhanced functionality.
- Seamlessly integrated the Spotify API for user authentication and music searching functionality.
